

API LIST – MOM Management System

I've grouped APIs **module-wise**, exactly how you should structure them in

`app/api/*`

1. Authentication APIs

 `app/api/auth`

Method	Endpoint	Purpose
POST	<code>/api/auth/login</code>	User login
POST	<code>/api/auth/logout</code>	User logout
GET	<code>/api/auth/me</code>	Get logged-in user info

2. Users APIs

 `app/api/users`

Method	Endpoint	Purpose
POST	<code>/api/users</code>	Create user (Admin)
GET	<code>/api/users</code>	Get all users
GET	<code>/api/users/{id}</code>	Get user by ID
PUT	<code>/api/users/{id}</code>	Update user
PATCH	<code>/api/users/{id}/status</code>	Activate / deactivate user
DELETE	<code>/api/users/{id}</code>	Delete user

3. Department APIs

 `app/api/departments`

Method	Endpoint	Purpose
POST	<code>/api/departments</code>	Create department
GET	<code>/api/departments</code>	Get all departments
PUT	<code>/api/departments/{id}</code>	Update department
DELETE	<code>/api/departments/{id}</code>	Delete department

4. Staff APIs

 `app/api/staff`

Method	Endpoint	Purpose
POST	<code>/api/staff</code>	Create staff profile
GET	<code>/api/staff</code>	Get all staff
GET	<code>/api/staff/{id}</code>	Get staff by ID
PUT	<code>/api/staff/{id}</code>	Update staff
PATCH	<code>/api/staff/{id}/status</code>	Activate / deactivate staff
DELETE	<code>/api/staff/{id}</code>	Delete staff

5. Meeting Type APIs

 `app/api/meeting-types`

Method	Endpoint	Purpose
POST	<code>/api/meeting-types</code>	Create meeting type
GET	<code>/api/meeting-types</code>	Get all meeting types
PUT	<code>/api/meeting-types/{id}</code>	Update meeting type
DELETE	<code>/api/meeting-types/{id}</code>	Delete meeting type

6. Venue APIs

 `app/api/venues`

Method	Endpoint	Purpose
POST	<code>/api/venues</code>	Create venue
GET	<code>/api/venues</code>	Get all venues
PUT	<code>/api/venues/{id}</code>	Update venue
DELETE	<code>/api/venues/{id}</code>	Delete venue

7. Meeting APIs (CORE)

 `app/api/meetings`

Method	Endpoint	Purpose
POST	<code>/api/meetings</code>	Create meeting
GET	<code>/api/meetings</code>	Get all meetings
GET	<code>/api/meetings/{id}</code>	Get meeting details
PUT	<code>/api/meetings/{id}</code>	Update meeting
PATCH	<code>/api/meetings/{id}/cancel</code>	Cancel meeting
DELETE	<code>/api/meetings/{id}</code>	Delete meeting

8. Meeting Member / Attendance APIs

 `app/api/meeting-members`

Method	Endpoint	Purpose
POST	<code>/api/meeting-members</code>	Add staff to meeting
GET	<code>/api/meeting-members/{meetingId}</code>	Get participants
PATCH	<code>/api/meeting-members/{id}/attendance</code>	Mark attendance
DELETE	<code>/api/meeting-members/{id}</code>	Remove participant

9. Documents (MOM) APIs

 `app/api/documents`

Method	Endpoint	Purpose
POST	<code>/api/documents</code>	Upload MOM document
GET	<code>/api/documents/{meetingId}</code>	Get meeting documents
DELETE	<code>/api/documents/{id}</code>	Delete document

10. Reports APIs

 `app/api/reports`

Method	Endpoint	Purpose
GET	<code>/api/reports/meeting/{id}</code>	Meeting-wise report
GET	<code>/api/reports/summary</code>	Summary report
GET	<code>/api/reports/attendance/{meetingId}</code>	Attendance report

11. Dashboard APIs

 `app/api/dashboard`

Method	Endpoint	Purpose
GET	<code>/api/dashboard/stats</code>	Dashboard counts
GET	<code>/api/dashboard/recent-meetings</code>	Recent meetings
