

Minutes of Meeting (MOM) Management System

1. Introduction

- The Minutes of Meeting (MOM) Management System is a web-based application designed to automate the process of managing meetings, recording minutes, tracking attendance, and maintaining meeting-related documents in an organized manner.

2. Problem Statement

- Manual meeting management leads to data inconsistency, difficulty in tracking attendance, loss of documents, and inefficiency. A centralized system is required to overcome these issues.

3. Objectives

- To automate the process of scheduling and managing meetings within an organization.
- To provide a centralized platform for recording and storing Minutes of Meeting (MOM) in a structured and secure manner.
- To enable accurate and efficient tracking of attendance for all meeting participants.
- To reduce manual paperwork and minimize errors associated with traditional meeting management methods.
- To support role-based access control for Admin, Meeting Organizer (Convener), and Staff users.
- To allow uploading, viewing, and downloading of meeting-related documents and MOM files.
- To generate meeting-wise and summary reports for better monitoring and decision-making.
- To improve transparency and accountability by maintaining a complete history of meetings and decisions.
- To enhance productivity by simplifying communication and follow-up through recorded action items and decisions.
- To ensure data consistency, integrity, and easy retrieval of meeting information.

4. Scope

- The system provides functionality to create, edit, and cancel meetings in a structured and organized manner.
- It supports attendance management by allowing meeting organizers to add participants and mark their presence digitally.
- The system allows uploading, viewing, and downloading of Minutes of Meeting (MOM) documents and related files.
- It maintains a centralized repository for all meeting records, attendance data, and documents.
- The system generates meeting-wise and summary reports for analysis and record keeping.
- Role-based access control ensures that users can access features according to their assigned roles.
- The system improves transparency, efficiency, and traceability of meeting-related activities.

5. Users

- **Admin**
 - System management and maintenance
 - Master data management (Meeting Types, Departments, Venues, Staff)
 - View all meetings, attendance, and reports
 - User access control and system configuration
- **Meeting Organizer (Convener)**
 - Conduct and manage meetings
 - Create, edit, and cancel meetings
 - Add participants and mark attendance
 - Upload MOM documents and related files
 - View meeting-wise and summary reports
- **Staff**
 - View assigned meetings and details
 - Check attendance status
 - View and download MOM documents
 - Limited access based on assigned permissions

6. Functional Requirements

- **User Login**
 - The system shall allow users to log in securely using valid credentials and provide access based on their assigned roles.
- **Role-Based Access Control**
 - The system shall restrict functionalities according to user roles such as Admin, Meeting Organizer, and Staff.
- **Meeting Creation, Editing, and Cancellation**
 - The system shall allow authorized users to create new meetings, modify existing meeting details, and cancel meetings with appropriate reasons.
- **Participant Management**
 - The system shall allow meeting organizers to add or remove participants for a meeting.
- **Attendance Marking**
 - The system shall provide functionality to mark and store attendance of participants for each meeting.
- **Minutes of Meeting (MOM) Management**
 - The system shall allow uploading, viewing, and downloading of MOM documents and related files.
- **Document Upload and Management**
 - The system shall support secure uploading and management of meeting-related documents.
- **Meeting Viewing**
 - The system shall allow users to view meeting schedules, details, and past meeting records.
- **Report Generation**
 - The system shall generate meeting-wise and summary reports related to meetings and attendance.
- **User Profile Management**
 - The system shall allow users to view and update their profile details.

7. Non-Functional Requirements

- **Security**
 - The system shall ensure secure authentication, role-based access control, and protection of sensitive meeting and user data.
- **Performance**
 - The system shall provide fast response times for user actions such as meeting retrieval, attendance marking, and document access.
- **Scalability**
 - The system shall be capable of handling an increasing number of users, meetings, and records without performance degradation.
- **Usability**
 - The system shall provide a user-friendly interface that is easy to understand and use for all types of users.

8. Use Case Identification

- **Common Use Cases (All Users)**
 - Login
 - Logout
 - View Dashboard
 - View Profile
- **Admin Use Cases**
 - Manage Users
 - Manage Roles & Permissions
 - Manage Meeting Types
 - Manage Departments
 - Manage Venues
 - View All Meetings
 - View Attendance Records
 - Generate Reports

- **Meeting Organizer (Convener) Use Cases**

- Create Meeting
- Edit Meeting
- Cancel Meeting
- Add Meeting Participants
- Mark Attendance
- Upload Minutes of Meeting (MOM)
- Upload Meeting Documents
- View Meeting-wise Reports
- View Summary Reports

- **Staff Use Cases**

- View Assigned Meetings
- View Meeting Details
- Check Attendance Status
- View MOM Documents
- Download MOM Documents
